123 Main Street, Your Town, Your State, 704-123-4567 jjohnson@mail.com

## **Objective:**

To obtain a field electrician position with a reputable electrical contractor in the commercial electrical industry. I believe I can bring value to the company as I continue to learn and work towards the next level electrical license. I will work hard to obtain a foreman type position in the company and help the company to continue to grow successfully.

## **Work Experience:**

### **Electrician, ABC Electric, Charlotte NC**

March 2018 to May 2020

Duties: Unloading and inventorying electrical materials, trencher operations up to 24" deep, installation of underground cables and PVC conduits, installing wiring from #12 to 500 kcmil in conduits, building conduit strut racks for overhead installations, installing mc cable and electrical items for commercial wall rough, installation of electrical switches, receptacles, occupancy sensors, and data locations per plans, installation of 2x2, 2x4, and 1x4 light fixtures, installed ½" to 2" conduits, installation of Lutron lighting controls, familiar with reading and interpreting job specifications.

### **Electrician's Helper, New Home Electric, Charlotte NC**

June 2015 to March 2016

Duties: Unloading and inventorying electrical materials, drilled walls for NMC, installed receptacle and switch boxes per plans, installed CAT5 cabling, assisted installing NMC cables, assisted installing up to 200 amp services, installed light fixtures, switches, and receptacles, dug 18" deep trenches by hand, installed SEU and SER cable, and many other typical residential electrical work.
