## INSTALLING PHOTOVOLTAIC SYSTEMS

*Based on the NEC*

### Solar PV Training Course Based on the NEC

Learn:

- How PV technology works
- System components
- System types
- How PV power merges with utility
- Bi-directional metering
- Installation methods
- Sizing conductors
- Disconnects
- Rapid shutdown

Installing  
Photovoltaic  
Systems

# Welcome NC Electricians!

## What Does North Carolina Require?

### 4 to 8 Hours of Continuing Education Required

- NC I, L, U, SP SFD licensees must complete 8 hours of continuing education every year. Half of those hours must come from an in-person or VILT classroom session.
- NC SP-FA/LV, SP-EL, SP-PH, SP-WP, SP-ES, SP-SP licensees must complete 4 hours of continuing education every year. Half of those hours must come from an in-person or VILT classroom session.
- Today's class is worth 4 hours of classroom/VILT continuing education.

7

## Important Reminders

- If you have trouble hearing or need assistance, let us know.
- Make sure you have paid and provided JADE Learning your electrical license number.
- Be sure to sign-in/check-in and confirm your registration information is correct. Make sure your name is showing correctly.
- You will be emailed a copy of your certificate within 2 business days.
- You must complete a short survey at the end of class to receive credit from the state. Your instructor will provide the link and answer any questions.

### Questions? Concerns?

## 2020 NEC Changes NC AMENDMENTS

The new *2020 NC Electrical Code* does not apply to one-and two-family dwellings. The 2017 NC Electrical Code applies to one-and two-family dwellings.

<https://www.ncosfm.gov/codes/state-electrical-division/state-electrical-code-and-interpretations>

## 2020 NORTH CAROLINA STATE ELECTRICAL CODE

Article 10 - ADMINISTRATIVE SECTION 10.1 states that all **Administrative Regulations & Code Amendments** declared in:

<https://www.ncosfm.gov/codes/state-electrical-division/state-electrical-code-and-interpretations>

along with requirements from the 2020 National Electrical Code (NFPA-70 - 2020) as adopted by the North Carolina Building Code Council on June 8, 2021, and made effective November 1, 2021, shall be known as the **North Carolina Electrical Code**, and may be cited as such or as the **State Electrical Code**. **NOTE: This code shall not apply to one- and two-family dwellings. The 2017 State Electrical Code shall apply to one- and two-family dwellings.**

**JADE**  
**LEARNING**  
A TPC COMPANY

11

11

## WHERE TO APPLY NORTH CAROLINA ELECTRICAL CODE

NEW 2020 NC Electrical Code	OLD 2017 NC Electrical Code
Multi-family dwellings such as apartment buildings containing three or more dwelling units.	Single-family dwellings.
Any building with three or more dwelling units such as assisted living facilities.	Two-family dwellings such as duplex buildings.
Commercial spaces where applicable.	
Industrial spaces where applicable.	
Any other space governed by the current NC Electrical Code.	

12

# 2020 NEC Changes The Scope of the NEC

**JADE  
LEARNING**  
A TPC COMPANY

13

13

## 90.2(A) Scope. Covered.

### Newly Added to the Scope of the 2020 NEC

- Installations that supply shore power to ships and watercraft inside marinas and boatyards.
- The monitoring of leakage current at those same installations.
- Installations that export power from electric vehicles to a building or structure's wiring. (*Called bidirectional current flow*).

**JADE  
LEARNING**  
A TPC COMPANY

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

14

14

# 2020 NEC Changes Chapter 1

## What is CHAPTER-1 of the 2020 NEC?

### GENERAL

Chapter 1 covers the following general electrical requirements:

- NEC Definitions
- Requirements for electrical installations

*Let's Begin with*  
**Definitions**  
*Important Changes in the 2020 NEC*

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

17

17

## 100 Definitions- Accessible.

Newly Revised Definition for: **Accessible**

(1 of 3)

**Accessible (Equipment)—**  
*Capable of being reached for  
 operation, renewal, and inspection.*

**NOTE:** This new definition is similar to  
 but not the same as equipment  
 defined as: **READILY ACCESSIBLE**

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

18

18

## 100 Definitions- Accessible.

Newly Revised Definition for: **Accessible**

(2 of 3)

### **READILY ACCESSIBLE**

*Capable of being reached quickly for operation, renewal, or inspection without requiring those to whom ready access is requisite to take actions such as to use tools (other than keys), to climb over or under, to remove obstacles, or to resort to portable ladders and so forth.*

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

19

19

## 100 Definitions- Accessible.

Newly Revised Definition for: **Accessible**

(3 of 3)

### **Summary:**

The new definition for *Accessible* is not the same as being *Readily Accessible*.

Notice “ACCESSIBLE” doesn’t care if you must use tools or ladders, or if you must climb over or move objects to reach equipment.

2020 NEC Changes

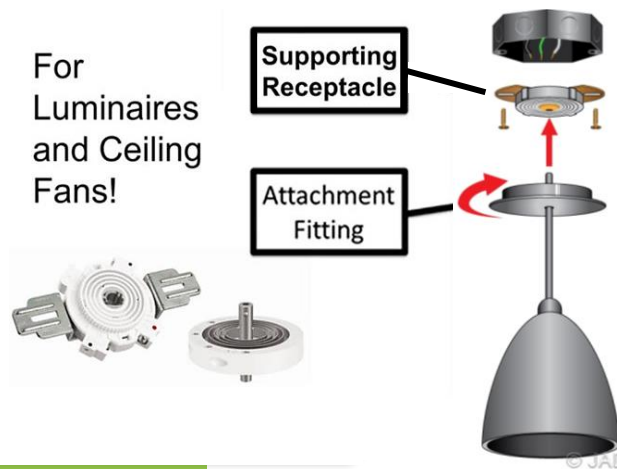

[www.jadelearning.com](http://www.jadelearning.com)

20

20

## 100 Definitions- Attachment Fitting.

A Brand-New Definition: **Attachment Fitting**

### **Attachment fitting—**

*A device that, by insertion into a locking support and mounting receptacle, establishes a connection between conductors of the attached utilization equipment and the branch-circuit conductors connected to the locking support and mounting receptacle.*

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

21

21

## 100 Definitions- Dormitory Unit.

A Brand-New Definition: **Dormitory Unit**

(1 of 2)

### **A Dormitory Unit—**

- A building or space in a building where sleeping accommodations are provided for more than 16 people who are not related.
- May be one room or a series of closely associated rooms under single management.
- Does not contain individual cooking facilities.

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

22

22

## 100 Definitions- Dormitory Unit.

**JADE**  
LEARNING  
A TPC COMPANY

(2 of 2)

A Brand-New Definition: ***Dormitory Unit***

Now electricians and inspectors can recognize a ***DORMITORY UNIT*** and properly apply:

GFCI protection:  
210.8(B)

AFCI protection:  
210.12(B)

Tamper-resistant receptacles:  
406.12(7)

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

23

23

## 100 Definitions- Equipotential Plane.

**JADE**  
LEARNING  
A TPC COMPANY

A Brand-New Definition: ***Equipotential Plane***

***Equipotential Plane***—  
Accessible conductive parts  
bonded together to reduce  
voltage gradients (differences)  
in a designated area.

Equipotential simply means:  
**EQUAL VOLTAGE**

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

24

24

## 100 Definitions- Fault Current & Available Fault Current.

**JADE  
LEARNING**  
A TPC COMPANY

(1 of 3)

Brand-New Definitions: ***Fault Current & Available Fault Current***

- ***Fault Current—***

*The current delivered at a point on the system during a short-circuit condition.*

- ***Available Fault Current—***

*The largest amount of current capable of being delivered at a point on the system during a short-circuit condition.*

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

25

25

## 100 Definitions- Fault Current & Available Fault Current.

**JADE  
LEARNING**  
A TPC COMPANY

(2 of 3)

Example: ***Fault Current & Available Fault Current***

***Example:***

If this energized wiring shorts against the metal grid ceiling, the current flowing on the grid ceiling will become the **FAULT CURRENT**.

The MAXIMUM current that can flow during this event is **AVAILABLE FAULT CURRENT**.

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

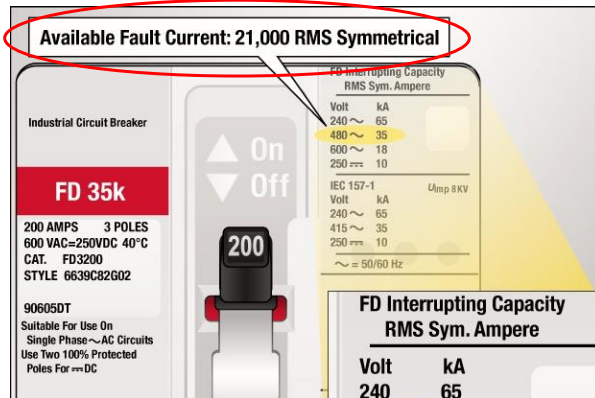

26

26

## 100 Definitions- Fault Current & Available Fault Current.

(3 of 3)

Example: **Fault Current & Available Fault Current**

**Example:**

The **AVAILABLE FAULT CURRENT** is marked on this service disconnect switch. The marking means at this specific equipment site, up to 21,000 amps of current can flow should a short-to-ground or phase-to-phase fault event occur.

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

27

27

## 100 Definitions- Grounded Conductor.

(1 of 2)

**A New Informational Note says:**

*Although an Equipment Grounding Conductor (EGC) is grounded, it is not considered a "grounded conductor" by the NEC.*

Remember, an EGC is typically green or bare and only carries fault-current; it is **NOT** considered a current-carrying conductor.

A Grounded Conductor is usually white (or gray) and it is considered a current-carrying conductor.

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

28

28

## 100 Definitions- Grounded Conductor.

**JADE**  
LEARNING  
A TPC COMPANY

(2 of 2)

### Example:

#### Grounded Conductor per the NEC:

The white or gray conductor that provides a return path for current and measures zero-volts.

#### Grounding Conductor per the NEC:

The green or bare conductor (or metal conduit) that carries fault-current, should a short-to-ground condition occur. This path enables the circuit breaker or fuse to trip.

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

29

29

## 100 Definitions- Habitable Room.

**JADE**  
LEARNING  
A TPC COMPANY

### Brand-New Definition: **Habitable Room**

*A room for living, sleeping, eating or cooking, but excluding bathrooms, closets, hallways, storage, and utility spaces.*

#### Includes:

- Bedrooms
- Family Rooms
- Kitchens
- Dining Rooms

#### Does not Include:

- Bathrooms
- Closets
- Hallways
- Storage &
- Utility Spaces

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

30

30

## 100 Definitions- Island Mode.

Brand-New Definition: ***Island Mode***

**JADE**  
LEARNING  
A TPC COMPANY

(1 of 2)

**WHAT IS ISLAND MODE?** If you disconnect power-producing equipment or an isolated microgrid system (such as a solar PV system) from the utility company power that it works in conjunction with, you have placed that equipment or microgrid system into an operational mode called ***ISLAND MODE***.

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

31

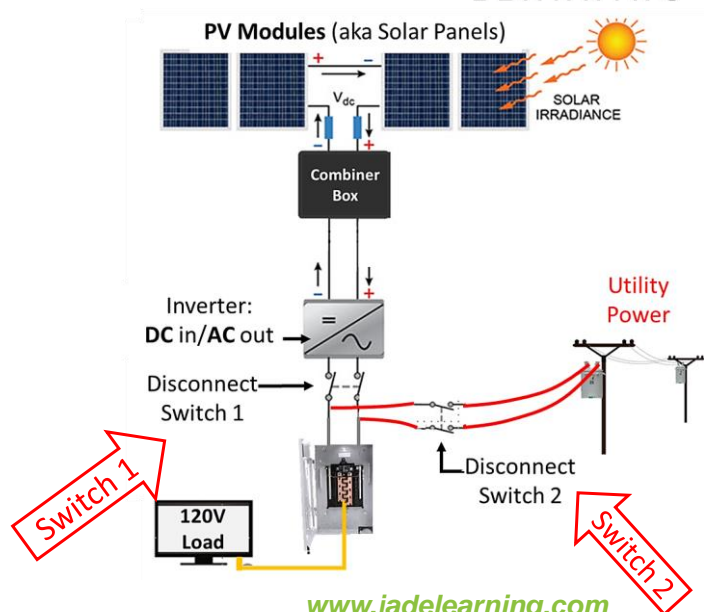

## 100 Definitions- Island Mode.

Example: ***Island Mode***

To put this microgrid (PV) system into ***ISLAND MODE***, you would open Switch 2, and close Switch 1.

The power generated by the PV system would then be “islanded” or isolated from utility power.

(2 of 2) **JADE**  
LEARNING

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

32

## 100 Definitions- Labeled.

A new **Informational Note** now accompanies the definition of **LABELED**

**LABELED** (Definition has not changed)—  
Equipment or material with a label, symbol, or  
identifying mark acceptable to the AHJ.

**Informational Note** (new for the 2020 NEC)—  
If a listed product is of such a size, shape,  
material, or surface texture that it is not possible  
to apply legibly the complete label to the  
product, the label may appear on the smallest  
unit container in which the product is packaged.

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

33

33

## 100 Definitions- Reconditioned.

Brand-New Definition: **Reconditioned**

**Reconditioned**—  
Electromechanical systems, equipment,  
apparatus, and components that are  
restored to operating conditions.

- Also referred to as rebuilt, refurbished, or remanufactured.
- Replacing a damaged circuit breaker with a new circuit breaker is NOT considered reconditioning a panel.

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

34

34

## Marking of Equipment & Working Clearances

*Important Changes in the 2020 NEC*

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

35

35

## 110.22 Requirements for Electrical Installations. Identification of Disconnecting Means.

Section 110.22(A) in the 2020 NEC requires the following new markings on non-dwelling equipment disconnects:

*In other than one- or two-family dwellings, the marking shall include the identification of the circuit source that supplies the disconnecting means.*

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

36

36

## 110.26(A)(3) Height of Working Space.

### The 2020 NEC Clarifies:

Support structures such as concrete pads located under electrical equipment cannot extend more than 6 inches beyond the front of electrical equipment.

- The 2017 NEC did not specify if a concrete pad holding equipment off the ground was included in the 6-inch rule!

**Working clearance described in 110.26(A)(3):**  
The working space must be clear and extend from grade, floor, or platform, to a height of 6 ½ ft. or the height of the equipment, whichever is greater.

2020 NEC Changes

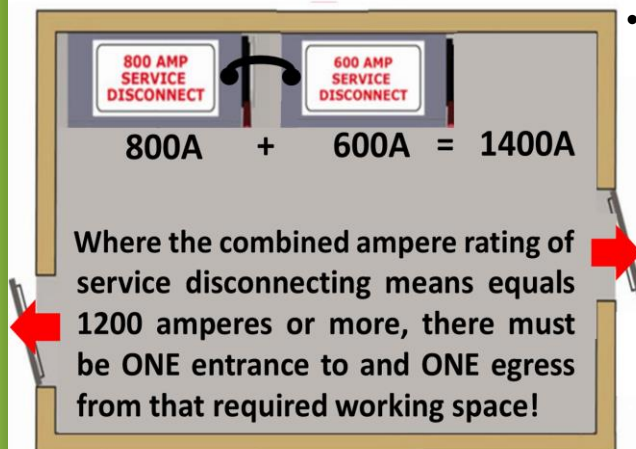

[www.jadelearning.com](http://www.jadelearning.com)

37

37

## 110.26(C)(2) Large Equipment.

The conditions that trigger the requirement to have **TWO OPENINGS** near large electrical equipment have changed in the 2020 NEC:

2020 NEC Changes

- In the 2020 NEC, one entrance and one egress is required for any area containing service disconnecting means with a combined rating of 1200 amps or more, when equipment is over 6 feet wide and installed according to Section 230.71.

**NOTE:** You must now consider the **TOTAL AMPS** of multiple pieces of equipment in an equipment area.

[www.jadelearning.com](http://www.jadelearning.com)

38

38

**AFCI**

**10 Minute Break**

Electrician Talk:  
**AFCI and GFCI circuit breakers look alike.**

**But do you think AFCI circuit breakers provide the same type of protection as GFCI circuit breakers?**

**Can you explain the difference to your customer?**

**JADE Learning**

**GFCI**

**AFCI**

**JADE LEARNING**  
A TPC COMPANY

**2020 NEC Changes**

[www.jadelearning.com](http://www.jadelearning.com)

39

**2020 NEC CHANGES**

**Chapter 2**

**JADE LEARNING**  
A TPC COMPANY

40

## What is CHAPTER-2 of the 2020 NEC?

### WIRING and PROTECTION

Chapter 2 covers the following *Wiring and Protection requirements*:

- Use and identification of grounded (white) conductors
- Branch circuits and feeders
- Services
- Overcurrent and overvoltage protection
- Grounding and bonding

*2020 NEC Changes*

[www.jadelearning.com](http://www.jadelearning.com)

41

## Identifying Conductors and Terminals

*Important Changes in the 2020 NEC*

*2020 NEC Changes*

[www.jadelearning.com](http://www.jadelearning.com)

42

42

## 200.10(B) Identification of Terminals.

**JADE**  
**LEARNING**  
A TPC COMPANY

(1 of 2)

- **2017 NEC:**

Grounded (neutral) terminals must be coated or manufactured of metal that is white in color or marked by the word "white" or with the letter "W."

- **2020 NEC:**

Grounded (neutral) terminals must be coated or manufactured of metal that is white or silver or marked by the word "white" or with the letter "W."

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

43

43

## 200.10(B) Identification of Terminals.

**JADE**  
**LEARNING**  
A TPC COMPANY

(2 of 2)

### Why the change?

A close look at a receptacle or switch reveals terminals or screws are not white in color. The terminals for the grounded conductor are usually silver in appearance.

**THE NEC WAS JUST CATCHING UP!**

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

44

44

## 210.5(C)(1) Branch Circuits Supplied From More Than One Nominal Voltage System.

(1 of 4) **JADE**  
LEARNING  
A TPC COMPANY

### What the 2017 and 2020 Code share in common:

Where the building's wiring contains branch circuits supplied from more than one voltage system, each ungrounded (hot) conductor of each branch circuit must be identified by phase or by line.

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

45

45

## 210.5(C)(1) Branch Circuits Supplied From More Than One Nominal Voltage System.

(2 of 4) **JADE**  
LEARNING  
A TPC COMPANY

### The 2017 Code Language:

210.5(C)(1) Branch Circuits Supplied from More Than One Nominal Voltage System. *Where the premises wiring system has branch circuits supplied from more than one nominal voltage system, each ungrounded conductor of a branch circuit shall be identified by phase or line and system at all termination, connection, and splice points in compliance with 210.5(C)(1)(a) and (b).*

**(a) Means of Identification.** *The means of identification shall be.....*

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

46

46

## 210.5(C)(1) Branch Circuits Supplied From More Than One Nominal Voltage System.

### The 2020 Code Language:

210.5(C)(1) Branch Circuits Supplied from More Than One Nominal Voltage System. *Where the premises wiring system has branch circuits supplied from more than one nominal voltage system, each ungrounded conductor of a branch circuit shall be identified by phase or line and by system voltage class at all termination, connection, and splice points in compliance with 210.5(C)(1)(a) and (b). **Different systems within the same premises that have the same system voltage class shall be permitted to use the same identification.***

**(a) Means of Identification.** *The means of identification shall be.....*

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

47

47

## 210.5(C)(1) Branch Circuits Supplied From More Than One Nominal Voltage System.

### Summary

- **2017 NEC:** Different electrical systems of the same voltage class in the same building must use different identification systems at every termination.
- **2020 NEC:** Different electrical systems of the same voltage class in the same building are now allowed to use **the same** means of identification.

2020 NEC Changes

48

## GFCI Protection

### General Requirements

*Important Changes in the 2020 NEC*

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

49

49

## 210.8 GFCI Protection for Personnel

The 2020 NEC SAYS

(1 of 3)

**210.8 Ground-Fault Circuit-Interrupter Protection for Personnel.** Ground-fault circuit-interrupter protection for personnel shall be provided as required in 210.8(A) through (F). The GFCI shall be installed in a readily accessible location.

For the purposes of this section when determining the distance from receptacles, the distance shall be measured as the shortest path the supply cord of an appliance connected to the receptacle would follow without piercing a floor, wall, ceiling, or fixed barrier, or the shortest path without passing through a window.

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

50

50

## 210.8 GFCI Protection for Personnel

(2 of 3)

The 2020 NEC SAYS

**210.8 Ground-Fault Circuit-Interrupter Protection for Personnel.** Ground-fault circuit-interrupter protection for personnel shall be provided as required in 210.8(A) through (F). The GFCI shall be installed in a readily accessible location.

For the purposes of this section when determining the distance from receptacles, the distance shall be measured as the shortest path the supply cord of an appliance connected to the receptacle would follow without piercing a floor, wall, ceiling, or fixed barrier, or the shortest path without passing through a window.

**Amended by NC!**

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

51

51

## 210.8 GFCI Protection for Personnel

**NC AMENDMENT**

(3 of 3)

Amended text underlined below.

**210.8 Ground-Fault Circuit-Interrupter Protection for Personnel.** Ground-fault circuit-interrupter protection for personnel shall be provided as required in 210.8(A) through (F). The GFCI shall be installed in a readily accessible location.

For the purposes of this section when determining the distance from receptacles, the distance shall be measured as the shortest path the supply cord of an appliance connected to the receptacle would follow without piercing a floor, wall, ceiling, or fixed barrier, or the shortest path without passing through a window, door or doorway, excluding cabinet doors.

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

52

52

## GFCI Protection

### Dwelling Units

*Important Changes in the 2020 NEC*

*2020 NEC Changes*

[www.jadelearning.com](http://www.jadelearning.com)

53

53

## 210.8(A) Branch Circuits. Ground Fault Circuit-Interrupter (GFCI) Protection. Dwelling Units.

(1 of 2)

### New in the 2020 NEC

GFCI protection is now required in **11 locations** in a dwelling per NEC Section 210.8(A).

The 2017 NEC required only 10 locations!

**210.8(A)(11) [LOCATION 11]:  
Indoor Damp And Wet  
Locations.**

*2020 NEC Changes*

[www.jadelearning.com](http://www.jadelearning.com)

54

54

## 210.8(A) Branch Circuits. Ground Fault Circuit-Interrupter (GFCI) Protection. Dwelling Units.

**JADE**  
**LEARNING**  
A TPC COMPANY  
(2 of 2)

### Example: [LOCATION 11]

210.8(A)(11) requires GFCI protection for:  
*INDOOR DAMP AND WET LOCATIONS* .....like a designated DOG WASHING AREA IN THE HOME!

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

55

## 210.8(A) Branch Circuits. Ground Fault Circuit-Interrupter (GFCI) Protection. Dwelling Units.

**JADE**  
**LEARNING**  
A TPC COMPANY  
(1 of 3)

### 210.8(A)(2) Garages & Accessory Buildings.

No changes to GFCI protection requirements for dwelling unit garage & accessory buildings in the 2020 NEC, but there are NC amendments!

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

56

## 210.8(A) Branch Circuits. Ground Fault Circuit-Interrupter (GFCI) Protection. Dwelling Units.

### NC AMENDMENT

(2 of 3)

First, what does the 2020 NEC say?

NEC 210.8(A)(2) requires GFCI protection for receptacles located in dwelling unit garages, and also accessory buildings that have a floor located at or below grade level not intended as habitable rooms and limited to storage areas, work areas, and areas of similar use.

But NC AMENDMENT 210.8(A)(2) declares an exception to that ground-fault (GFCI) requirement:

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

57

57

## 210.8(A) Branch Circuits. Ground Fault Circuit-Interrupter (GFCI) Protection. Dwelling Units.

### NC AMENDMENT

(3 of 3)

The NC AMENDMENT declares that ceiling mounted receptacles installed exclusively for garage door openers are exempt from GFCI requirements.

#### AMENDMENT 210.8(A)(2)

Exception: Single or duplex receptacles that are located more than 2.44 m (8 ft) above the floor and specifically for connection to permanently installed cord-and-plug garage door openers. A duplex receptacle shall only be permitted under this exception where two cord-and-plug garage door openers utilize both contact devices of the duplex receptacle.

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

58

58

## 210.8(A) Branch Circuits. Ground Fault Circuit-Interrupter (GFCI) Protection. Dwelling Units.

(1 of 2)

### 210.8(A)(3) Outdoors.

No changes in the 2020 NEC to GFCI protection requirements for receptacles installed outdoors of dwellings, but there are NC amendments!

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

59

59

## 210.8(A) Branch Circuits. Ground Fault Circuit-Interrupter (GFCI) Protection. Dwelling Units.

### NC AMENDMENT

(2 of 2)

First, what does the 2020 NEC say?

NEC 210.8(A)(3) requires GFCI protection for receptacles installed outside of dwellings—with an exception for ice melting equipment. But NC AMENDMENT 210.8(A)(3) provides an additional exception to this requirement:

### AMENDMENT 210.8(A)(3). Outdoors.

Exception No. 2 to 210.8(A)(3): A single outlet receptacle supplied by a dedicated branch circuit that is located and identified for specific use by a sewage lift pump.

2020 NEC Changes

### NC AMENDMENT

(3 of 3)

NC AMENDMENT 210.8(A)(5) keeps GFCI requirements for basements the same as the 2017 Code cycle!

**AMENDMENT 210.8(A)(5).** Unfinished portions or areas of the basement not intended as habitable rooms

The NC amended version of 210.8(A)(5) requires GFCI protection for unfinished and uninhabitable areas of a dwelling unit basement only. The new 2020 NEC requirement to GFCI protect receptacles in all areas of the basement, even finished areas is not in force.

## GFCI Protection

Locations Other Than Dwelling Units  
*Important Changes in the 2020 NEC*

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

67

67

## 210.8(B) GFCI Protection for Personnel. Other Than Dwelling Units.

(1 of 3)

**Let's begin with a note about previous North Carolina Amendments and NEC Section 210.8(B) that addresses GFCI protection for *other than dwelling units*.**

The requirement for three-phase receptacles to be GFCI protected was introduced in the 2017 NEC and it was removed by the 2017 NC Amendments. The 2017 NC Amendment however has not been renewed. Therefore, GFCI protection **does** apply to three-phase receptacles required by Section 210.8(B) in the 2020 State Electrical Code.

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

68

68

## 210.8(B) GFCI Protection for Personnel. Other Than Dwelling Units.

(2 of 3)

Here are four new locations in *Other than Dwelling Units* where GFCI protection is now required for single-phase, 125- to 250-volt receptacles rated 50-amps or less, and 3-phase (except 480-volt) receptacles rated 100 amps or less:

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

69

69

## 210.8(B) GFCI Protection for Personnel. Other Than Dwelling Units.

(3 of 3)

- **210.8(B)(2).** Not just kitchens but any area *with a sink and permanent provisions for food prepping or cooking.*
- **210.8(B)(6).** Not just indoor wet locations but *damp locations* too!
- **210.8(B)(11).** *Laundry Areas.*
- **210.8(B)(12).** *Bathtubs and Shower Stalls- where receptacles are installed within 6 feet of the outside edge of the bathtub or shower stall.*

North Carolina offers no amendments.

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

70

70

## 210.8(B) GFCI Protection for Personnel.

(1 of 2)

Next is an amendment from NC that applies to the GFCI protection of sewage lift pumps in locations *Other than Dwelling units*:

This amendment may sound familiar. It also applies to DWELLING UNITS—previously discussed.

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

71

71

## 210.8(B) GFCI Protection for Personnel.

### NC AMENDMENT

(2 of 2)

**AMENDMENT 210.8(B)(4): GFCI—sewage lift pumps—*Other than Dwelling units*:**

First, what does the 2020 NEC say?

NEC Section 210.8(B)(4) requires GFCI protection for receptacles installed outdoors *at other than dwelling units* except when used for snow melting equipment and at supervised industrial locations.

The North Carolina Amendment adds one more exception!

**AMENDMENT 210.8(B)(4).** Exception No. 3: A single outlet receptacle supplied by a dedicated branch circuit that is located and identified for specific use by a sewage lift pump. [Does not require GFCI protection per NC]

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

72

72

## 210.8(C) Crawl Space Lighting Outlets.

In the 2020 NEC, GFCI protection for crawl space lighting outlets (120-volts or less) has been moved from Section 210.8(E) to 210.8(C).

GFCI protection is required for lighting outlets in dwelling and commercial crawl spaces!

2020 NEC Changes

No change to the Code otherwise.

[www.jadelearning.com](http://www.jadelearning.com)

73

73

## 210.8(D) Branch Circuits. Ground-Fault Circuit-Interrupter Protection for Personnel. **Specific Appliances.**

In the 2020 NEC—  
GFCI protection requirements for dishwashers moved from Section 210.8(D) to **Article 422. Appliances.**

- Note: The 2017 State Electrical Code did not require GFCI protection for dishwashers per NC Amendment 210.8. This amendment has NOT been renewed in the 2020 State Electrical Code.

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

74

74

## 210.8(D) Branch Circuits. Ground-Fault Circuit-Interrupter Protection for Personnel. **Specific Appliances.**

### In the 2020 NEC—

210.8(D) serves as a roadmap pointing electricians to Article 422 for determining GFCI protection requirements for all six appliances named in Article 422.

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

75

75

## 210.8(E) Equipment Requiring Servicing.

In the 2020 NEC— GFCI protection is now required for all 125-volt, single-phase receptacles required within 25' of equipment according to 210.63(A) & (B).

### GFCI PROTECTION IS REQUIRED IN ATTICS NEAR HVAC!

- (1) Receptacle required in attic near HVAC per 210.63
- (2) GFCI protection for that receptacle is now required per 210.8(E)

- 210.63(A) requires a 125-volt receptacle within 25 feet of all HVAC and refrigeration equipment **including in attics!**
- 210.63(B) requires a 125-volt receptacle in *other than dwellings* in the same room as any service equipment, and in the same room as any dedicated equipment.

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

76

76

## 210.8(F) GFCI Protection for Personnel.

### NC AMENDMENT

Here is another NC AMENDMENT that applies to ground-fault protection.

NEC Section 210.8(F) is *NEW* in the 2020 NEC. North Carolina Amendment 210.8(F) deletes that new Section!

NEC Section 210.8(F) requires GFCI protection for all outdoor outlets at dwellings, other than those covered in 210.8(A)(3), Exception to (3), that are supplied by single-phase branch circuits rated 150-volts to ground or less, 50-amps or less.

**AMENDMENT 210.8(F).** DELETED

## 210.12(D). AFCI for Extended Branch Circuits

### NEC Section 210.12(D) in the 2020 NEC states the following:

(D) Branch Circuit Extensions or Modifications — Dwelling Units, Dormitory Units, and Guest Rooms and Guest Suites. Where branch circuit wiring for areas specified in 210.12(A), (B), or (C) is modified, replaced, or extended, the branch circuit shall be protected by one of the following:

- (1) By any means described in 210.12(A)(1) through (A)(6)
- (2) A listed outlet branch-circuit-type AFCI at the first receptacle outlet of the existing branch circuit

Exception: AFCI protection shall not be required where the extension of the existing branch circuit conductors is not more than (6 ft) and does not include any additional outlets or devices, other than splicing devices.

2020 NEC Changes

### NEW in the 2020 NEC—

- 2020 NEC moved all dwelling unit info from NEC 220.12 to NEC 220.14(J).
- 220.12 expanded to 29 occupancies.
- Motors less than 1/8 hp and connected to lighting circuits are now considered part of the general lighting load of a service calculation.

[www.jadelearning.com](http://www.jadelearning.com)

100

## 220.14(J) Unit Loads for Dwelling Units.

- In the 2020 NEC, 220.14(J) contains all dwelling unit information for performing a service calculation.
- The general lighting load for dwellings is still 3 VA for each square foot, excluding porches, garages, and unused or unfinished spaces not adaptable for future use.
- Motors less than 1/8 hp and powered by lighting circuits (such as bath fans) are now included in the general lighting load of the dwelling service calculation.

2020 NEC Changes

101

## 220.53 Appliance Load - Dwelling Units.

- In the 2020 NEC, the demand factor of 75% can only be applied to four or more appliances when they are rated  $\frac{1}{4}$  hp or 500 watts or more, each.
- The 2017 NEC had no such restriction for applying the appliance demand factor of 75%.

## Overcurrent Protection & Overvoltage Protection

*Important Changes in the 2020 NEC*

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

116

116

## 240.62, 240.88, 240.102 Reconditioned Equipment (Overcurrent Protection Equipment).

**JADE**  
LEARNING  
A TPC COMPANY

Sections 240.62, 240.88, & 240.102 have been added to the 2020 NEC to address RECONDITIONED OVERCURRENT PROTECTION EQUIPMENT

- Low-voltage (1000 volts or less) and medium-voltage (over 1000 volts) fuseholders and nonrenewable fuses are NOT permitted to be reconditioned.
- Molded-case circuit breakers are NOT permitted to be reconditioned, but low- and medium power circuit breakers, as well as high-voltage circuit breakers are permitted to be reconditioned.

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

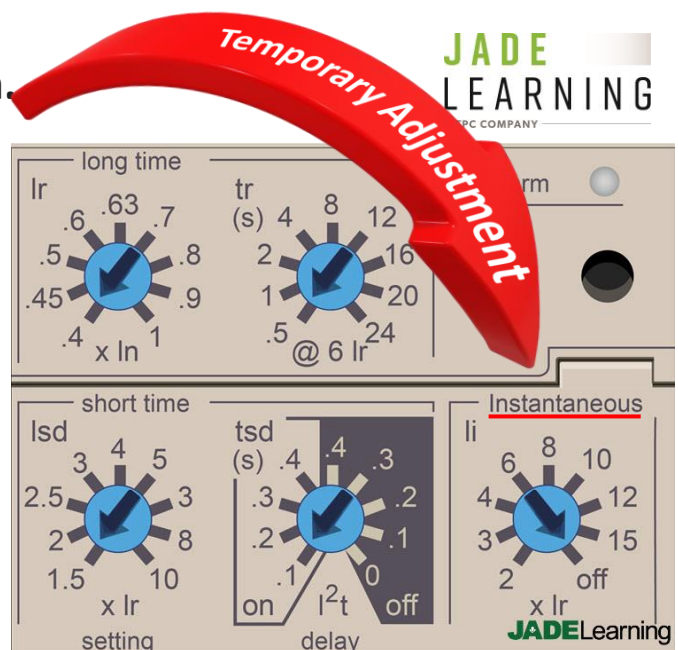

117

117

## 240.87 Arc Energy Reduction.

In the 2020 NEC-

- Arc energy reduction systems must be set to operate at less than the available arcing current of the circuit.
- But temporary adjustment of the instantaneous trip setting is not permitted as a means of compliance.
- Documentation of the system and performance testing must be made available to the AHJ.

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

118

118

## 242 Overvoltage Protection.

### Surge Protection

### In the 2020 NEC-

Brand-new Article 242 replaces the surge protection Code requirements previously found in 2017 NEC Articles 280 and 285.

Four types of **Surge-Protective Devices** are covered in this new 2020 NEC Article:

1. Line side of service disconnect.
2. Load side of service disconnect.
3. Portable equipment (multi-outlet plug strip).
4. Built into the equipment.

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

120

120

## 250 Grounding and Bonding.

### In the 2020 NEC-

- Figure 250.1 was revised to better reflect the contents of Article 250.
- The definition for “Supply-Side Bonding Jumper” was moved from NEC 250.2, to Article 100 *Definitions*.
- The phrase “*and Bonding*” was removed from Article 250 Part II because it is covered in Part V.

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

121

## 250.25 Grounding of Systems Permitted to be Connected to the Supply Side of the Disconnect.

### In the 2020 NEC-

PV system (and similar type) disconnects acting as service equipment for add-on systems, when connected to the supply-side of a utility-fed electrical system now require grounding and bonding according to new NEC Section 250.25.

**Previous editions of the NEC failed to require grounding & bonding for supply-side connected disconnects!**

2020 NEC Changes

122

122

## 250.53(C) Grounding and Bonding. Grounding Electrode System Installation. Bonding Jumper.

**JADE**  
LEARNING  
A TPC COMPANY

### In the 2020 NEC-

- Rebar in a concrete foundation must be used as a grounding electrode but the rebar cannot be used as a bonding jumper to tie together other electrodes.
- A separate bonding jumper (not rebar) must be used to interconnect the electrodes of the grounding electrode system.

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

123

123

## 250.64(A) Grounding Electrode Conductor. Aluminum or Copper-Clad Aluminum Conductors.

**JADE**  
LEARNING  
A TPC COMPANY

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

124

124

- In the 2020 NEC- Outdoor aluminum or copper-clad aluminum conductors are still not permitted to terminate within 18 inches of the earth.
- However, the 2020 NEC makes it clear that aluminum conductors terminated **inside of outdoor enclosures** listed for their environment **are** permitted to terminate within 18 inches of the earth.

## 250.64(B)(2) & (B)(3) Grounding Electrode Conductor Protection for Physical Damage.

- Size 6 AWG and larger grounding electrode conductors (GECs) must be protected by an approved raceway when exposed to physical damage.
- GECs smaller than 6 AWG must be protected even when NOT exposed to physical damage.

### New in the 2020 NEC:

**Schedule 80 PVC is now specified as the ONLY type of PVC approved for protecting a GEC from physical damage.**

2020 NEC Changes

www.jadelearning.com

125

125

## 250.109 Metal Enclosures.

### In the 2020 NEC-

The 2020 NEC now declares a metal box can provide continuity between equipment grounding & bonding conductors.

In this image the metal box provides continuity between the bonding jumper and the 1-inch EMT.

2020 NEC Changes

www.jadelearning.com

126

126

## 250.119 Identification of Equipment Grounding Conductor.

**JADE**  
LEARNING  
A TPC COMPANY

The 2020 NEC allows residential electricians to reidentify, as equipment grounding conductors, No. 6 AWG and smaller conductors included in cables such as NM or MC Cable.

### In the 2020 NEC-

Electricians are no longer prohibited from reidentifying size 6 AWG and smaller conductors as equipment grounding conductors (EGC).

In previous Code cycles, reidentifying an EGC was only permitted in a supervised location.

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

127

127

## 250.121(B) Restricted Use of Metal Frames.

**JADE**  
LEARNING  
A TPC COMPANY

### In the 2020 NEC-

250.121(B) says the structural metal framing of a building or structure shall not be used as an equipment grounding conductor (EGC).

The NEC means that metal buildings are not allowed as electrical paths for fault current.

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

128

128

## 250.122 Size of Equipment Grounding Conductors.

### In the 2020 NEC-

Equipment grounding conductors no longer have to be upsized when installing conductors in high ambient temperatures— or when installing four or more conductors in a conduit.

However, they must be upsized if voltage drop is present due to using especially long conductors. In the 2020 NEC the size increase can be calculated by a qualified person instead of by the NEC!

2020 NEC Changes

RATING OR SETTING OF AUTOMATIC OVERCURRENT DEVICE IN CIRCUIT AHEAD OF EQUIPMENT, CONDUIT, ETC., NOT EXCEEDING (AMPERES)	Size (AWG or kcmil)

# 2020 NEC Changes Chapter 4

## What is CHAPTER-4 of the 2020 NEC? Equipment for General Use

Chapter 4 covers the following requirements for *Equipment for General Use*:

- Flexible cords, flexible cables, and fixture wires
- Switches and receptacles
- Switchboards, switchgear, and panels
- Luminaires
- Appliances
- Fixed electric space heating, motors, air conditioning, generators, transformers and more.

*Let's Begin Chapter 4 with*

(1 of 6)

### What is a snap switch?

Article 100 of the NEC defines a general-use snap switch as a type of general-use switch made to be installed in device boxes, on box covers, or with other wiring systems permitted in the NEC.

General-use snap switches can use alternating-current (ac) or direct-current (dc) with resistive, inductive, or other types of loads.

# Receptacles & Separable Connectors

*Important Changes in the 2020 NEC*

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

173

173

## 406.3(A) Receptacle Rating and Type. Receptacles.

(1 of 5)

**Section 406.3(A) has been revised in 2020 NEC to say:**

*Receptacles shall be listed and marked with the manufacturer's name or identification and voltage and ampere ratings. Receptacles shall not be permitted to be reconditioned.*

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

174

174

## 406.4(D)(4) Replacements. AFCI Protection.

(2 of 5)

### When Replacing Older Receptacles:

When replacing receptacles at older electrical outlets, if the outlet location is named in Section 210.12 of the current edition of the NEC as a location requiring arc-fault (AFCI) protection, the electrician must provide that replacement receptacle with some form of approved arc-fault protection.

- **Four arc-fault methods have been approved for this scenario, and up until the 2020 NEC, two exceptions were approved that allowed electricians to forego providing that AFCI protection.**

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

175

175

## 406.4(D)(4) Replacements. AFCI Protection.

(3 of 5)

### When Replacing Older Receptacles:

The first exception stated where no equipment grounding conductor (EGC) was found at the outlet box and no arc-fault protection device was commercially available to protect such a two-wire replacement receptacle, AFCI protection was not required.

However, in the new 2020 NEC, since AFCI protection is commercially available for these receptacles, *Exception No.1* has been removed from the Code section.

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

176

176

## 406.4(D)(4) Replacements. AFCI Protection.

(4 of 5)

### When Replacing Older Receptacles:

The first exception stated where no equipment grounding conductor (EGC) was found at the outlet and no arc-fault protection device was available to protect such a two-wire receptacle, AFCI protection was not required. However, in the new 2020 NEC, Exception No. 1 has been removed from this section.

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

177

177

## 406.4(D)(4) Replacements. AFCI Protection.

(5 of 5)

### NC AMENDMENT

The AMENDMENT to 406.4(D)(4) simply removes 406.4(D)(4) from the NC Electrical Code so there is no requirement to provide AFCI protection to a replacement receptacle when it previously did not require AFCI protection.

Amendment 406.4(D)(4). Arc Fault Circuit Interrupter Protection. Deleted.

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

178

178

## 406.4(D)(7) Replacements. Controlled Receptacles.

In the 2020 NEC

**406.4(D)(7) states:**

*Automatically controlled receptacles shall be replaced with equivalently controlled receptacles.*

*If automatic control is no longer required, the receptacle and any associated receptacles marked in accordance with 406.3(E) shall be replaced with a receptacle and faceplate not marked in accordance with 406.3(E).*

191

191

## 408.4(A) Field Identification Required. Circuit Directory or Circuit Identification.

**JADE**  
**LEARNING**  
A TPC COMPANY

(2 of 2)

### What's New in 2020 NEC?

A circuit directory can be installed:

- On the face of a panel door.
- Inside a panel door.
- OR
- In an approved location adjacent to the panel door.

**(This is new for the 2020 NEC!)**

But the AHJ must approve all "adjacent" location(s).

**Adjacent  
Location**

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

192

192

## 408.6 Switchboards/Panelboards. Short-Circuit Current Rating.

### In the 2020 NEC

Section 408.6 extends available fault current marking requirements to all switchboards, switchgear and panelboards in other than one- and two-family dwelling units.

- **The Short Circuit Current Rating (SCCR) on equipment must be no less than the available fault current able to pass through the equipment.**

2020 NEC Changes

[www.jadelearning.com](http://www.jadelearning.com)

193

193

## 408.8 Switchboards/Panelboards. Reconditioning of Equipment.

2020 NEC Changes

### In the 2020 NEC

If switchboards, switchgear, or panelboards are damaged by fire, fire-related contaminants or water, the equipment must be evaluated by the original manufacturer or a qualified testing lab (UL) before returning to service.

[www.jadelearning.com](http://www.jadelearning.com)

194

194

## 408.18(C)(2) Clearances. Connections. Grounded Circuit Conductors.

2020 NEC Changes

### In the 2020 NEC

There are NEW rules for the placement of grounded (neutral) lugs inside enclosures.

The new rules apply to switchboards and switchgear, but not panelboards.

## 408.43 Panelboard Orientation.

### In the 2020 NEC

Panelboards are now prohibited from being installed on their backs, facing up.

- **An interesting fact:**  
Panelboards may be placed horizontally (on their side), but all the breaker handles must be up when "on" which means one side of the panel can't be used!

2020 NEC Changes
